

Jaihee Choi

CONTACT INFORMATION	Cudahy Hall 369 1313 W Wisconsin Ave Milwaukee, WI 53202	<i>Office:</i> (414) 288-6979 <i>Email:</i> jaihee.choi@marquette.edu <i>Website:</i> jaiheechoi.github.io
ACADEMIC POSITIONS	Marquette University , Milwaukee, WI Assistant Professor, Department of Mathematical and Statistical Sciences	2024 - Present
	University of Texas MD Anderson Cancer Center , Houston, TX Graduate Research Assistant, Department of Biostatistics	2020 - 2024
EDUCATION	Rice University , Houston, TX Ph.D., Statistics • Dissertation Topic: “Methods for High-Dimensional Inference in Genetic Association Studies for Complex Time-to-Event Data” • Advisor: Professor Ryan Sun (Biostatistics, MD Anderson Cancer Center) M.A., Statistics	May 2024
	University of Notre Dame , Notre Dame, IN B.S., Applied & Computational Math / Statistics Secondary Major: Economics	May 2019
HONORS AND AWARDS	IMS New Researchers Conference Travel Award ICSA Applied Statistics Symposium Travel Award NIH T32 Biostatistics Training Grant (\$128,000) Caucus for Women in Statistics Lee Family Travel Award James R. Thompson Student Award ENAR Distinguished Student Paper Award Rice University College of Engineering Future Faculty Fellow Omicron Delta Epsilon Honor Society Grace Hopper Women in Technology Conference Travel Award Dean’s List	2025 2025 2020 - 2024 2024 2024 2024 2023 2018 - 2019 2018 2017 - 2018
TEACHING EXPERIENCE	<i>Instructor</i> MATH 4710 Mathematical Statistics, Marquette University MATH 4720 Statistical Methods, Marquette University MATH 4740 Biostatistical Methods and Models, Marquette University Ph.D. Qualifying Exam Review Sessions, Rice University • Created the course content and taught the review sessions for the statistical inference portion of the qualification exams. <i>Teaching Assistant</i> GS01 1023 Survival Analysis, UT Health STAT 280 Elementary Applied Statistics, Rice University STAT 315 Statistics for Data Science, Rice University	2025 - 2026 2024 - 2025 2026 2023 2023 2020 - 2021 2019
PUBLICATIONS	Huang, H. and Choi, J. (2026) Bayesian Sparse Variable Selection and Variance-Components Testing for Genetic Association with Multiple Interval-Censored Outcomes. <i>In preparation.</i>	

Choi, J., Kui, N., Sun, R. (2025). Interval-Censored Bayesian Variable Selection for Genome-wide Association Studies. *In Revision*.

Kui, N., Yu, Y., **Choi, J.**, McCaw, Z., Li, X., Huff, C., Sun, R. (2026) Large impact of genetic data processing steps on stability and reproducibility of set-based analyses in genome-wide association studies. *Genetics*, 234(1):p.iyag079.

Zhu, H., **Choi, J.**, Sun, R. (2026). Identification of pleiotropic genetic risk variants for pancreatic cancer and diabetes. ASCO Gastrointestinal Cancers Symposium. *Journal of Clinical Oncology*, 44(2 suppl): 692.

Xu, Z., **Choi, J.**, Sun, R. (2024) Set-Based Tests for Genetic Association Studies with Interval-Censored Competing Risks Outcomes. *Statistics in Biosciences*.

Choi, J., Xu, Z., Sun, R. (2024). Variance-components tests for genetic association with multiple interval-censored outcomes. *Statistics in Medicine*, 43(13): 2560-2574.

Zhu, H., **Choi, J.**, Kui, N., Yang, T., Wei, P., Li, D., Sun, R. (2024). Identification of Pancreatic Cancer Germline Risk Variants With Effects That Are Modified by Smoking. *JCO Precision Oncology*, 8, e2300355.

Abuhadra, N., Sun, R., Yam, C., Rauch, G.M., [et al, including **Choi, J.**]. (2023). Predictive Roles of Baseline Stromal Tumor-Infiltrating Lymphocytes and Ki-67 in Pathologic Complete Response in an Early-Stage Triple-Negative Breast Cancer Prospective Trial. *Cancers*, 15, 3275.

Ge, L., **Choi, J.**, Zhao, H., Li, Y., Sun, J. (2023). Regression analysis of mixed panel count data with dependent observation processes. *Journal of Nonparametric Statistics*, 1-16.

Strati, P., Jallouk, A.P., Sun, R., **Choi, J.**... Neelapu, S.S. (2022). Impact of conditioning chemotherapy on lymphocyte kinetics and outcomes in LBCL patients treated with CAR T-cell therapy. *Leukemia*, 36(11): 2669-2677.

INVITED TALKS

Medical University of South Carolina Department of Public Health Sciences Seminar. “High-Dimensional Inference for Genetic Association with Interval-Censored Data”. Charleston, SC. April 2026.

Korean International Statistical Society Webinar. “High-Dimensional Inference for Genetic Association with Interval-Censored Data”. Virtual. January 2026.

University of Tennessee Health Science Center Biostatistics Seminar Series. “High-Dimensional Inference for Genetic Association with Interval-Censored Data”. Virtual. January 2026.

Medical College of Wisconsin Biostats Seminar Series. “High-Dimensional Inference for Genetic Association with Interval-Censored Data”. Milwaukee, WI. November 2025.

University of Notre Dame Statistics Seminar. “High-Dimensional Inference for Genetic Association with Interval-Censored Data”. Notre Dame, IN. September 2025.

ICSA Applied Statistics Symposium. “Identification of Pleiotropic Genetic Risk Variants for Pancreatic Cancer and Obesity”. Storrs, CT. June 2025.

Rice University College of Engineering Future Faculty Fellows “Types of Institutions and Faculty Positions”. Houston, TX. March 2025.

CFE-CMStatistics. “Bayesian Variable Selection for Interval-censored outcomes in Genome-wide Association Studies”. London, UK. December 2024.

ICSA Applied Statistics Symposium. “Bayesian Variable Selection for Interval-censored outcomes in Genome-wide Association Studies”. Nashville, TN. June 2024.

Marquette University Colloquium. “Inference for Set-Based Effects in Genome-Wide Association Studies with Multiple Interval-Censored Outcomes”. Milwaukee, WI. December 2023.

CONTRIBUTED
TALKS AND
POSTERS

Joint Statistical Meetings. “Interval-censored Bayesian Fine-mapping using Functional Annotations for Genetic Variants”. Nashville, TN. August 2025.

IMS New Researchers Conference (Poster). “Interval-censored Bayesian Fine-mapping using Functional Annotations for Genetic Variants”. Nashville, TN. August 2025.

Joint Statistical Meetings. “Identifying Risk Variants for Colorectal Cancer via Interval-censored Fine-mapping”. Portland, OR. August 2024.

ENAR Spring Meeting. “Variance-components Tests for Genetic Association with Multiple Interval-censored Outcomes”. Baltimore, MD. March 2024.

Leading Edge of Cancer Research Symposium (Poster). “Set-based Methods to Identify Genetic Variants Jointed Associated with Cancer and Diabetes”. Houston, TX. November 2023.

Joint Statistical Meetings. “Bayesian Variable Selection of Genetic Risk Factors Associated with Interval-censored Outcomes”. Toronto, ON, CA. August 2023.

American Society of Human Genetics Annual Meeting (Poster). “Inference for Set-based Effects in Genome-wide Association Studies with Multiple Interval-censored Outcomes”. Los Angeles, CA. October 2022.

Women in Statistics and Data Science (Poster). “Set-based Methods to Identify Genetic Variants Associated with Falls and Fractures Susceptibility.” Saint Louis, MO. October 2022.

Joint Statistical Meetings. “Inference for Set-Based Effects in Genome-wide Association Studies with Multiple Interval-Censored Outcomes”. Washington D.C. August 2022.

Women in Data Science Conference. “Identifying Biomarkers of Alzheimer’s Disease via Integrated Principal Components Analysis.” Virtual. October 2020.

Rice University Department of Statistics Poster Showcase (Poster). ”Implementation of Bayesian Variable Selection via Penalized Credible Intervals.” Houston, TX. December 2019.

INDUSTRY
EXPERIENCE

Data Analyst Consultant
HundredX - Del Mar, CA

2018

	<i>Sports Science Analyst</i> Notre Dame Athletics - Notre Dame, IN	2017 - 2018
PROFESSIONAL SERVICE	<i>Conference Organizing Committee</i> ASA Symposium on Data Science Statistics - Milwaukee, WI	2026
	<i>Conference Organizing Committee</i> Texas Women in Math Symposium - Houston, TX	2022
	<i>Research Experience for Undergraduates (REU) Student Administrator</i> Rice University Statistics Department - Houston, TX	2022
	<i>Executive Board Member</i> Rice Association for Women in Mathematics - Houston, TX	2021 - 2022
SOFTWARE PACKAGES	SIMICO: An R package for performing a genetic association between a set of genetic variants and multiple correlated interval-censored outcomes.
